VERTICAL SLIDING SASH WINDOWS

Classic Georgian styling with 21st
century energy efficiency and security.

Distinctive sash window style with all the low-maintenance, high-security benefits of PVC-U

When you want to capture the classic, stylish looks of Georgian sliding windows, without the associated risks of draughts and poor security, our vertical sliding sash windows are the perfect solution.

The advanced, precision-engineered PVC-U system enables you to enjoy the sophisticated style of the Georgian era, with all the performance benefits of PVC-U materials from the modern age.

The cutting-edge design features triple brush seals for exceptional draught proofing, plus an anti-jemmy bar and reinforced hardware for optimum security. Both of the sliding upper and lower sashes also tilt inwards to enable safe and easy cleaning from inside your home. There's an overhead vent to supply constant fresh air, and low-line beads and gaskets to improve appearance and allow maximum levels of natural light.

Window features optional Georgian bars in Irish Oak finish

Elegant looks to enhance *your home*

Our vertical sliding sash windows enable you to achieve a classic, distinctive look for your home, with all the high-performance, low-maintenance benefits of PVC-U.

The design echoes the timeless styling of the Georgian era, with two sliding sashes, decorative horns and sculpted ovolo frames. Plus, our unique sculpted Georgian bars and fixings subtly enhance aesthetics further, adding yet more character*. Our windows are guaranteed to create an eye-catching feature for any home, providing much sought-after cottage-style appearance.

Cleaning and maintenance has never been simpler

The innovative design of sliding sash windows means that they can easily be cleaned and maintained from within your home. As well as sliding up and down, both upper and lower sashes tilt inwards so that the outer panes can be accessed from inside the home. It means that windows above ground floor level can be cleaned safely without the need for ladders.

What's more, PVC-U requires very little maintenance to keep your windows looking as good as new. No painting or preservative treatments are required. An occasional wipe down with a damp cloth is all that's needed to keep the frames looking as bright and attractive as the day they were fitted.

* Georgian bars are available as an option

Enjoy a warm and comfortable home -
all year round

Thanks to the advanced engineering of our windows, traditional cottage looks can now be combined with exceptional energy efficiency and draught-proofing.

You can rely on our windows to keep your home warm and comfortable in all weathers, as well as keeping your energy bills down. The PVC-U window frame has a three-chambered cross section, helping to keep warm air in and cold air out – for superior thermal insulation. The system also features triple brush seals around the openings for exceptional draught-proofing.

A breath of fresh air

Vertical sliders have been designed to keep your home fresh and well ventilated. Both top and bottom sashes can be partially opened, allowing fresh air to enter through the lower opening while warm, stale air escapes through the top. This enables air to circulate constantly, keeping your rooms cool and fresh on hot summer days. In addition, an overhead vent allows a trickle of fresh air to flow into your home in all weathers, without compromising security.

Built-in security keeps burglars at bay

Keeping your property secure against burglars is a primary concern for all homeowners. That's why our windows offer a host of robust and effective security features designed to keep intruders out.

Crucially, the window has a tough aluminium anti-jemmy bar to prevent the sash from being levered open by force. The robust steel-reinforced PVC-U frame and sash combined with a choice of high-security locks and hardware also help to keep burglars at bay.

Fire safe design

As well as high security, our windows offer excellent fire safety. They meet the requirements for a "means of escape" as set out in the Building Regulations Part B (fire safety), creating a large enough opening to escape through in the event of a fire.

Vertical sliding sash window in Cream

Sizes and colours to suit your home

Every window is individually made for your home, with sizes up to 1.6 x 3.0 metres available. Because every property is different, we offer a range of colours and woodgrain finishes – so you're sure to find a look that suits the style of your home.

Finishes available include:

White

Cream

Golden Oak

Rosewood

NEW!
Irish Oak

Faultless fitting – every time

When you choose our premium-quality windows, you can be sure they will be fabricated and fitted to a high standard. That's because a host of pre-machined parts and easy-fit components have been developed that enable fast, easy and faultless finish, every time.

Nothing is left to chance in the fabrication and installation of our windows. All components are designed to deliver a precise fit and consistently high quality standards.

PVC-U

the sustainable choice

For many years, PVC-U windows have been recognised as the durable, low-maintenance and energy-efficient option. Now, thanks to recent advances in recycling, PVC-U windows are the first choice for sustainability too.

Our windows are not only easy on the eye, they're easy on your wallet and the environment too

Re-useable and recyclable – for hundreds of years

Research has shown that 95% of 'post-consumer' or end-of-life PVC-U windows can be recycled. When combined with an initial product life for a PVC-U window of up to 35 years (BRE), the result is hundreds of years of re-use with minimal impact on the environment.

Sustainable component supplier

Our window frame components supplier, Plastmo, is at the forefront of sustainable developments in the PVC-U industry. It re-uses virtually 100% of its waste product in the manufacturing process, which amounts to around 3,000 tonnes per year, as well as buying waste product from other sources for recycling. The result is virtually zero Plastmo production waste going to landfill.
