Charisma VERTICAL SLIDER

by Plastmo Profiles Limited

Charisma from Plastmo Profiles is a modern vertical sliding sash window that combines classic, elegant detailing from the Georgian era with the very latest production techniques and technologies.

This cutting edge design incorporates modern low line beads, enhanced weather protection and inward opening sashes that allow easy cleaning.

Charisma is a stylish window that offers strong, secure build with incredibly low maintenance and thanks to the innovative aluminium security bar it helps to protect the bottom sash from being forced open.

And as you would expect from a company with over forty years experience, the Charisma vertical sliding sash window complies with the building regulations concerning thermal efficiency when used with thermally efficient glass.

For further information on the Charisma vertical sliding sash window, please contact the Plastmo sales team on freephone **0800 783 7580** or email **sales@plastmo.co.uk**
